

ADDENDUM TO RFQ/RFP
Trinidad Union School District
Proposition 39
Solar Photovoltaic System
Addendum #2
May 2, 2017

To All Prospective Proposers:

The Trinidad Union School District (District) herewith issues Addendum No. 2 to the above-referenced solicitation. This Addendum shall be made part of the Contract Documents. Except as specifically modified by this document, all other terms and conditions remain in full force and effect.

Answers to questions from Proposers:

1. **Question:** Will the Owner and Owner's Rep be willing to accept a Proposal from an ESCO if the ESCO's engineer does not meet the Professional Liability Insurance coverage of \$2,000,000 nor the Automobile Liability Insurance coverage of \$2,000,000?

Answer: Yes, the District will consider proposals from ESCOs that offer lower coverage limits of \$1,000,000 for both the required Professional Liability Insurance and Automobile Liability Insurance. However, the District would prefer to know (as an option) the incremental cost for increasing coverage limits from \$1,000,000 to \$2,000,000, should the District decide (prior to contract signing) that the higher coverage is desired.

2. **Question:** Will the Owner and Owner's Rep extend or remove the deadline for Finalize Design by June 8, 2017?

Answer: The District will consider proposals with alternate deadlines (from those shown in Appendix A of the RFQ/RFP) for milestones such as the "Finalize Design" date. The June 8, 2017 date for "Finalize Design" was based on a Summer 2017 installation.

3. **Question:** Will the District waive the Builders Risk Insurance coverage requirement?

Answer: The District will consider proposals without Builders Risk Insurance coverage, but prefers to know (as an option) the incremental cost for providing such coverage, should the District decide later (prior to contract signing) that the higher coverage is desired.

4. **Question:** What is the annual kilowatt hour usage of the school?

Answer: See table on following page.
