

**Redwood Coast Energy Authority**  
**Request for Qualification for**  
**Humboldt County Offshore Wind Energy**  
**Development Partners**

**RFQ-18-001**

**Addendum #1**  
**February 15, 2018**

This Addendum makes no modifications to the RFQ, but is to clarify the desired qualifications for Area of Capability #2 - Floating Offshore Wind Technology Provider and Project Design:

The factors described on page 9 of the RFQ under Area of Capability #2 in the RFQ are preferred criteria for the technological component, but are not required. As stated in the RFQ the criteria listed are “ideal Respondent qualifications” but RCEA will not deem a statement of qualifications “non-responsive” if the qualifications do not meet 100% of the desired technical criteria and will still review and score the response.
