RE: Support Clean, Renewable Energy in Humboldt County

null

Dear RCEA Board Members:

I fully support the RCEA Board adopting the official goal of providing 100% clean, renewable energy to Humboldt County by 2025.

As you all know, we are already experiencing the beginning of our global climate crisis.

Yet, even at this time of looming irreparable consequences, it is truly very hard for all of us to change our habits. We need every choice available for clean energy. I urge the Board to continue to be champions for clean, renewable energy, and adopt the official goal of providing 100% clean, renewable energy to Humboldt County by 2025.

Please set an example of leadership that is responding to the global climate crisis with a sense of urgency. Hopefully, other boards, commissions, elected officials, and agency staff will take cues from you and follow suit, today, not later.

I am grateful for our Community Choice Energy program, and am a proud REpower+ ratepayer. Thank you.

Sincerely, Oona Smith

Arcata, CA

From: Lynne Abels
To: Lori Taketa
Subject: renewable energy

Date: Wednesday, February 27, 2019 4:33:47 PM

I urge you to commit toward a clean energy resolution to move toward 100% renewables. I was surprised (and dismayed)to learn that our local energy has come in part from bio fuels. We need to stop burning carbon and this is a step backwards. I understand that part of the logic is to provide local truckers with work. That is laudable but I support providing work that is "right livelyhood" ie beneficial and useful not harmful. We will not be successful as a community or as a country unless we engage in creative ways with the future that is so rapidly approaching.

Thanks for all your work for us, Lynne Abels, Arcata

RE: Support Clean, Renewable Energy in Humboldt County

null

Dear RCEA Board Members:

I hope that you will take action at the February 28, 2019, meeting to adopt the official goal of providing 100% clean, renewable energy to Humboldt County by 2025.

We all know that we are facing a global climate crisis. Locally, this could mean sealevel rise, and more frequent and more severe droughts and wildfires.

One of the biggest sources of greenhouse gas emissions is electricity generation. Now more carbon-free electricity sources are becoming cost-competitive with fossil fuels. Fortunately, in Humboldt County, the community can express its energy priorities directly through the Community Choice Energy program administered by RCEA.

RCEA is already successfully providing cleaner electricity to Humboldt County consumers at lower rates than PG&E. Your Community Advisory Committee is recommending that the Board adopt a goal of 100% clean, renewable electricity by 2025. The CAC's recommendation is both reasonable and ambitious. With good planning and the right priorities, RCEA can achieve the community's goals for clean and renewable energy while still charging competitive rates to consumers. Please adopt the CAC's recommendations and help move Humboldt County to a clean energy future. Sincerely,

Sincerely, Ms. Carol Mone

Trinidad, CA 95570

RE: Support Clean, Renewable Energy in Humboldt County

null

Dear RCEA Board Members:

Please adopt the official goal of providing 100% clean, renewable energy to Humboldt County by 2025.

Our greenhouse gas emissions are creating a global climate crisis threatening us with catastrophic sea level rise, droughts and wildfires. And one of the biggest sources of greenhouse gas emissions is electricity generation.

Humboldt County can help confront this crisis through expansion of RCEA's Community Choice Energy program to 100% clean, renewable electricity by 2025.

Please adopt the CAC's recommendations and help move Humboldt County to the forefront of a clean energy future. Sincerely,
Joyce King

Sincerely, Ms. Joyce King

RE: Support Clean, Renewable Energy in Humboldt County

null

Dear RCEA Board Members:

I'm writing to urge you take action at your meeting on February 28, 2019, and adopt the official goal of providing 100% clean, renewable energy to Humboldt County by 2025. We are facing a global climate crisis. Locally, the effects of the climate crisis include potentially catastrophic sea level rise, along with an increase in the number and severity of droughts and wildfires. But we aren't just affected by climate change; we're also helping to cause it. And one of the biggest sources of greenhouse gas emissions is electricity generation. Fortunately, we live in a time when many carbon-free electricity sources are becoming cost-competitive with dirty fossil fuels. And we live in a place, Humboldt County, where the community can express its energy priorities directly through the Community Choice Energy program administered by RCEA.

RCEA is already successfully providing cleaner electricity to Humboldt County consumers at lower rates than PG&E. But the climate crisis demands that we take more ambitious action. Your Community Advisory Committee is recommending that the Board adopt a goal of 100% clean, renewable electricity by 2025. The CAC's recommendation is both reasonable and ambitious. With good planning and the right priorities, RCEA can achieve the community's goals for clean and renewable energy while still charging competitive rates to consumers. Please adopt the CAC's recommendations and help move Humboldt County to a clean energy future.

Sincerely,

Sincerely, Ms. Magdalena Borkowska Stockholm, ot 12939

Subject: Friends of the Eel River 100% supports RCEA's transition to 100% clean energy

Dear RCEA Board Members,

Friends of the Eel River supports the local transition to clean, sustainable, and renewable energy through the Community Choice Energy program administered by RCEA. I'm writing to urge you to take action at your February 28, 2019 meeting to adopt the official goal of providing 100% clean, renewable energy to Humboldt County by 2025.

We are pleased that RCEA is already successfully providing cleaner electricity to Humboldt County consumers at lower rates than PG&E. But the climate crisis demands that we take more ambitious action.

Your Community Advisory Committee is recommending that the Board adopt a goal of 100% clean, renewable electricity by 2025. This recommendation is both prudent and ambitious. With good planning and the right priorities, RCEA can achieve the community's goals for clean and renewable energy while still charging competitive rates to consumers.

To be clear, we do not support dams as a clean or sustainable energy source. Medium to large dams are increasingly understood to not only destroy fisheries but also as sources of climate change emissions (methane largely). While small scale hydro projects can provide some sustainable energy when properly designed, the vast majority of our nation's dams (and their reservoirs) should not be considered clean energy sources. We are unclear as to whether RCEA plans to count hydropower as a source of clean energy. If so, we urge you to reconsider.

We are facing a global climate crisis. In Humboldt, the effects of this crisis include potentially catastrophic sea level rise, and the likelihood of exacerbated weather extremes that bring increased wildfire, drought, and flood hazards. But we aren't just affected by climate change; we're also helping to cause it. And one of the biggest sources of greenhouse gas emissions is electricity generation. With renewable technology evolution now making clean energy generation cost-competitive with dirty energy before you even factor in the ecological costs, we no longer have any excuses for not taking urgent action to facilitate the transition.

We hope you will continue taking a lead on regional renewable energy development. Please adopt the CAC's recommendations and help move Humboldt County to a clean energy future.

Sincerely,

Stephanie Tidwell, Executive Director Friends of the Eel River

February 28, 2019

RCEA Board of Directors

Dear Directors:

As a Community Choice Energy customer, I urge the Board to adopt a goal of 100% clean energy by 2025 and create a plan to implement this goal.

I enthusiastically support rapid development of offshore wind and solar micro-grids, rapid development of a variety of energy storage processes and facilities, and collaboration with city and Humboldt County planning departments to maximize energy conservation above and beyond State of California requirements. I support the Board requiring community benefit agreements for all energy infrastructure contracts.

Wind and solar are the most reliable sources of clean energy over time. With climate disruption, hydro may be unreliable in the near future. Combustion energy sources, like biomass, are not clean; carbon dioxide is the combustion product 24/7. The latest climate studies show we have about 12 years to significantly reduce atmospheric carbon dioxide. In Humboldt County, the simplest most cost effective way to reduce atmospheric carbon dioxide is to keep out biggest, oldest redwood trees standing and photosynthesizing and manage both redwood and mixed evergreen forests to foster old growth characteristics.

As a CCE customer, I want my bill payments to go toward wind, solar and energy storage instead of subsidizing the timber industry by paying them to burn their waste.

Thank you for giving serious consideration to my input.

Sincerely,

Diane Ryerson

Arcata, CA 95521

Diane Lynn

February 28 2019

To: RCEA Board

Thank you for the opportunity to voice my support of clean renewable energy.

I recognize that RCEA is required to use biomass as a result of recent State laws; however, since biomass is the most expensive energy source that we rate payers must pay for, I urge RCEA to replace biomass with solar and wind energy and energy storage as soon as possible.

The vast majority of climate scientists support the evidence that global warming is at or near the tipping point at which abrupt climate change will ensue. We do not have the time available for biomass as a source of energy to be effectively carbon neutral.

Pollution from 24/7 biomass burning for energy is detrimental to human health. Dr. Ring in October 2016 stated the health concerns of the medical community. In the consent decree for the Blue Lake Power plant VS the US DOJ and EPA, the court states (top of page 25) ... "the reductions of CO and NOX will provide pollution reduction benefits to the surrounding community." Cleaner is not clean. The Scotia power plant is 873 ft from a grades K-8 school play ground.

The cost of biomass appears to be mandated by state law under the accounting concept called cost plus. My experience in other fields showed that cost plus rewards inefficiency. Additionally, all renewables have received indirect subsidies in terms of Productions Tax Credits. (See IRS 8835) There is even a way to sell excess credits.

Can staff assure the public that we are made aware of any Tax Credit Monetization that occurred in the past and may still be available for all renewable contracts?

In my opinion, biomass provides private profit over public good at a time when business as usual will be catastrophic.

Paying a premium for a consumable polluting fuel does not appear to be a prudent use rate payer fees. Energy cost savings should be used to acquire and/or invest in assets that will have a long useful life.

Thank you.

Walt Paniak

Arcata, CA 95521

Wilt Parual

My long-term personal goals for RCEA and Humboldt County - Michael Winkler

- On an annual basis, make Humboldt County a net energy producer based on local renewable energy sources (primarily wind, secondarily biomass, solar PV, small-scale hydro, biogas)
- On an annual basis, make Humboldt County a zero-net greenhouse gas producer (greenhouse gas emissions (CO2, methane, black carbon) totally offset annually by absorption by local forest growth)
- 3. Minimize exposure of local population to non-CO2 air emissions (particulates, CO, NOx) from biomass combustion (biomass power plants, wood stoves, wood fireplaces, controlled and uncontrolled burns) with special emphasis on vulnerable populations (children, elderly, persons with compromised respiratory function or other health problems). Pursue long-term replacement of existing biomass power plants with advanced, low-emission biomass gasification power plants. Phase out existing use of wood stoves and fireplaces and replacement with electric heat pumps.
- 4. Cost-effectively maximize energy efficiency to minimize total energy consumption
- To the maximum extent feasible, convert existing fossil fuel uses (natural gas, gasoline, diesel fuel, jet fuel, propane) to electricity.

Achieve the above goals while keeping electricity prices less than PG&E.

I would estimate that electricity is no more than 25% of total energy use in Humboldt County so I want to increase RCEA's emphasis on these other energy uses and especially on shifting existing natural gas use to renewable electricity.

I also think that people tend to confuse 100% renewable electricity and 100% renewable energy so I want to make this distinction clearer to people.

As I mentioned previously, I am less interested in the electricity that RCEA purchases coming 100% from renewable energy sources, especially if the electricity comes from outside Humboldt County, than I am in pursuing the five goals that I list above.

Michael Winkler

2/28/2019

The above represent my personal goals and do not necessarily reflect the position of RCEA or the RCEA Board of Directors
