

Heat Pump Rebates

Rebates may reduce or expire on June 30, 2023

		Base Rebate	+ per ton *	Qualified existing units	Qualified replacement units **
 Residential	Residential Mini-Split Heat Pump HP002	\$500/ system ***	+ \$150/ ton	Any	Mini-Split Heat Pump >= 16 SEER and HSPF >= 9.2 efficiency; Less than 65,000 Btu/hr cooling capacity
	Residential Central Heat Pump HP003	\$500/ system	+ \$150/ ton	Any	Residential Central Heat Pump >= 16 SEER and HSPF >= 9.2
	Heat Pump Water Heater HP001	\$600/ each	NA	Any	HP Water Heater UEF >= 3.30
	Panel Upgrade HP005	\$500/ panel	NA	NA	Upgrade Panel to accommodate any heat pump measure if converting from gas unit to electric
 Commercial	Commercial Heat Pump Water Heater HP007	\$600/ each	NA	Any	HP Water Heater 45-55 gal UEF >=3.31
					HP Water Heater 55-75 gal UEF >= 3.33
					HP Water Heater > 75 gal UEF >= 3.42
 Commercial	Commercial Packaged or Split Heat Pump HP008	\$600/ system	+ \$200/ ton	Existing Split or Packaged Unit with natural gas furnace and AC; 65-134 kBtu/h	IEER Rated Packaged Heat Pump 65-134 kBtu/h 14.0 IEER or higher efficiency
			+ \$200/ ton	Existing Split or Packaged Unit with natural gas or propane furnace and AC; <65 kBtu/h	SEER Rated Packaged or Split Heat Pump < 65 kBtu/h >= 17 SEER
 Commercial & Residential	Smart Water Heater Kicker HP004	\$200/ each	NA	NA	Add on to Heat Pump water heater measure
	Packaged Terminal Heat Pump HP009 (Res) HP010 (Com)	\$100/ each	+ \$45/ ton	Any	<= 7 kBtu/h Unit, 14.28 EER or better > 7 <= 15 kBtu/h high efficiency package terminal HP >12.84 EER > 15 >= 24 kBtu/h high efficiency package terminal HP >11.4 EER

* Total rebate=base rebate + per ton amount. 1 Ton=12,000Btu/h

** Customers looking to purchase units that do not meet the requirements on this list should contact an RCEA representative about possible additional rebates.

*** System = Split system with 1 Outdoor Unit + any number of indoor units or one packaged unit

Talk with your contractor about proper sizing. Improperly sized systems will be less efficient, costing you money and providing less comfort.

These rebates are provided by joint funding from the CPUC and RCEA. RCEA employees, Board, and their immediate families are not eligible for the RCEA portion of the rebate but are eligible for the CPUC portion.

Heat Pump Rebates

Residential & Commercial

Heat pumps have the potential to deliver significant savings on your heating bill because they deliver energy more efficiently than other sources. Heat pumps are actually air conditioners that include a reverse cycle for heating, so they cool homes in summer and heat them in winter. We offer several different types of rebates for both homes and businesses.

Rebates are available on a first-come, first-served basis, while funds last. Rebates may reduce or expire on June 30, 2023. RCEA recommends reserving your rebate once your project is contracted. Residential customers can apply for up to \$3000 total rebates. Commercial customers can apply for up to \$5000 total rebates.

Visit RCEA's Contractor & Vendor Network to find a local heat pump contractor. Contact RCEA for more information.
